# Unlimited fun for your Kids !

Playnation UAE offers kids playgrounds made from solid cedar wood in USA !

## Why Playnation ?...

WARRANTY

PLAYNATION offers 10 years Warranty on all playsets

- \* 10 years for residential use
- \* 5 years for Commercial use

# ADDING THE BEST safety

## FEATURES

Your child's safety is always our top priority. Features such as safety-coated swing chains, commercial-grade hardware, wide and flat ladder steps, self-reinforced slides, and 4x6 swing beams have made our swing sets some of the safest available anywhere.

We continue to raise the bar with the most innovative and progressive designs in the industry.

Below are overviews of just a few of our safety features:

PLAYNATION  
DIFFERENCE

### PRE-SANDED & PRE-DRILLED LUMBER

We discovered early on that we could sand the lumber at our factory, twice, for extra peace of mind. Our wood comes out smooth, beautiful and ready to use. We even pre-drill the majority of lumber to make installation even easier and save you time.

### COATED SWING CHAINS

Our swing chains have a soft plastic coating that is durable, flexible, and remains cool - even in direct sunlight. Moreover, it does not pinch small fingers and will not pull hair. The comfortable grip instills confidence in your little ones.

### HEAVY-DUTY SOLID WOOD CONSTRUCTION

Huge 4x6 swing beams are standard on all of our swing sets, and all other main support beams use solid wood posts. Using larger dimensional lumber leads to stronger, sturdier swing sets built using fewer total pieces. Fewer pieces helps cut installation time down, which saves you money!

### COMMERCIAL-GRADE HARDWARE

Our hardware consists of oversized bolts and heavy lag screws that are electro-galvanized to prevent corrosion. We bolt our iron swing hangers completely through our swing beams with carriage bolts & lock nuts. Decks, wall slats, and wood roofs all use commercial grade zinc-coated deck screws. Nails, which can work loose, are never used in the construction of our swing sets. For added safety, we even recess bolts into the wood and cap exposed threads.

### THE BEST SLIDES

Our slides are designed from the ground up and proudly made in the USA. Made with thick polyethylene and UV Protection to resist fading, our slides are heavy-duty and durable. For your peace of mind, our slides meet and/or exceed ASTM standards for backyard residential use.

We use only the best lumber to build our swing sets.

All lumber is hand-selected for its strength and durability.

## SELECTING THE finest LUMBER

#### About Our Lumber

Our swing sets are made of Cedar lumber. Our cedar is naturally resistant to rot, decay, and insect damage - all while offering an affordable option in backyard fun.

#### Timber Shield™

Many of our play sets feature our Timber Shield™ main posts & swing beams. Our Timber Shield™ uses solid 4x4 and 4x6 North American lumber which is then encased in a thick polyethylene. Timber Shield™ is splinter free, protected from the elements, and essentially maintenance-free.

Look for this icon to see whether Timber Shield™ is available.

#### Our Lumber vs Our Competition

Our lumber is heavier and thicker than the competition. Larger dimensional lumber = stronger, sturdier boards. See the difference for yourself!
